Active Tailings Facilities Region 9.xlsx

All, here is the spreadsheet that Alexis referred to, which John H populated with all of the NV and AZ tailings facilities at active mines (none in CA). He did not do the next layer of analysis, i.e., which of these facilities are similar to Mt. Polley. That will take much more time delving into the design and site features of each facility.

FYI, John is going out to Silverton, CO on Sunday as part of the team that will assess what went wrong and how to avoid such incidents in the future.
